Company Quality Policy

Claron is a BS: EN: ISO 9001 certified manufacturer of machined engineering plastic sealing components principally for the pneumatic and hydraulic industries.

Our Quality System supports our objective for the constant development of our organisation with not only the ability to understand but exceed our customers expectations whilst ensuring compliance with all relevant, statutory and contractual requirements. Our objective is to provide high quality products and we recognise that this can only be achieved by actively engaging all our staff in the constant pursuit of quality in everything that we do.

We are committed to:

- Working with our customers to understand and conform to their requirements
- Following a "Right First Time" philosophy ensuring that our customers get quality products on time with no defects.
- Involving our customers and suppliers in the continuous improvement process.
- Review of the management, maintenance and use of our processes and equipment to ensure continuous improvement.
- Empowering, training and involving our staff to help us deliver continuous improvement.
- The ongoing review of our "Quality Objectives."
- Maintaining the effectiveness of the "Quality Management System"

Signed:

Mr. C.R. Stanley
Managing Director
